SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
--	-----------	---------------

3 MONTHS

01/16/2007

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

**Office Action Summary**

Application No.

09/834,500

Applicant(s)

CRISTOFALO ET AL.

Examiner

DANIEL LASTRA

Art Unit

3622

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 05 September 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-34,52-78 and 195-200 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-34,52-78 and 195-200 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All   b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 3622

1. Claims 1-34, 52-78 and 195-200 have been examined. Application 09/834,500 (SYSTEM AND METHOD FOR TARGETING OBJECT ORIENTED AUDIO AND VIDEO CONTENT TO USERS) has a filing date 04/12/2001.

### **Response to Amendment**

2. In response to Non Final Rejection filed 05/04/2006, the Applicant filed an Amendment on 09/05/2006, which amended claims 1, 17, 26 and 52. Applicant's amendment overcame the Section 112 rejection.

### **Claim Rejections - 35 USC § 103**

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34, 52-57, 61-78 and 195-200 are rejected under 35 U.S.C. 103(a) as being unpatentable over Picco et al (U.S. 6,029,045) in view of Flickinger (US 2005/0210502).

As per claims 1, 17, 26, 52, 66 and 73, Picco teaches:

A system for transmitting a media object containing content targeted to a user based upon a user profile comprising:

an input port for receiving a media object containing content targeted to a user profile (see column 13, lines 35-55),

Art Unit: 3622

a transmitting system, connected to the input port, which transmits the media object in a programming signal to a user associated with the user profile (see column 14, lines 1-17);

whereupon receiving the media object from the input port, the transmitting system determines the user profile targeted by the media object, identifies a user associated with the user profile, and transmits the media object to the identified user (see column 1, lines 49-59; column 6, lines 25-37),

Picco does not expressly teach wherein the *transmitted* media object is part of a program composition comprising multiple media objects presented simultaneously and the *transmitted* media object is targeted separately from at least one other media object in the composition. However, Flickering teaches a system that replace existing ads in a MPEG program with alternate ads according to users' profiles, where said alternate ads are inserted directly into a portion of a screen during the actual programming (see Flickering paragraphs 34, 41, 42). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the application was made, to know that Picco would replace existing ads in a program with alternate ads according to users' profiles by inserting said alternate ads into a portion of a screen during the actual programming. Picco and Flickering would take advantage of all the ad replacements' availabilities in said program in order to maximize profits, as advertisers would be charged for all the available spots in said program which were replaced with target separately ads (*i.e.* target ads from different advertisers) that were presented simultaneously during the actual programming.

Art Unit: 3622

As per claims 2, 18, 29, 62 and 67, Picco teaches:

The system of claim 1, wherein the user profile is based upon information selected from the group consisting of: response by a user to a survey, demographic information, user viewing habits, selection of a media object by a user during a programming signal, purchase behavior, a compilation of viewing habits from at least two users, statistical information, and regional information (see column 2, lines 55-58; figure 4, item 152; column 7, lines 5-32).

As per claims 3 and 19, Picco teaches:

The system of claim 2, wherein the user profile is generated by a user profiling system located with the transmitting system (see figure 4, item 150, 152).

As per claims 4, 20, 30, 53 and 70, Picco teaches:

The system of claim 1, wherein the programming signal further comprises a signal in a form selected from the group consisting of: a video signal, an audio signal, a combined audio and video signal, animation, text, graphics, multimedia, slow frame video, video stills, sequence of individual frames, virtual reality, live, pre-recorded, natural, synthetic, combined natural and synthetic, and computer generated content (see column 3, lines 1-14; column 13, lines 19-23).

As per claims 5 and 21, Picco teaches:

The system of claim 1, wherein the programming signal is transmitted by the transmitting system to a receiving system via a transmission medium selected from the group consisting of: broadcast, microwave, millimeter wave, wireless, wireline, satellite, cable, and fiber optics (see column 1, lines 10-13, column 14, lines 58-67).

Art Unit: 3622

As per claims 6, 31 and 55, Picco teaches:

The system of claim 1, wherein the media object is received by the input port over a transmission medium selected from the group consisting of: broadcast, wireless, wireline, microwave, millimeter wave, satellite, cable, and fiber optics (see column 14, lines 58-67).

As per claims 7 and 75, Picco teaches:

The system of claim 1, wherein the transmitting system further comprises a wireless system selected from the group consisting of: television broadcasting system, radio broadcasting system, microwave systems, millimeter wave systems, infrared systems, wireless telecommunications system, and a satellite broadcasting system (see column 14, lines 1-17).

As per claim 8, Picco teaches:

The system of claim 1, wherein the transmitting system further comprises a wired system utilizing a communications medium selected from the group consisting of: cable, coaxial cable, twisted pair cable, fiber-optic cable, telephone cable, and closed circuit cable (see column 7, lines 10-16).

As per claims 9, 22, 32, 65 and 71, Picco teaches:

The system of claim 1, wherein the input port receives the media object via a stand-alone system from a data storage medium selected from the group consisting of: compact disc, digital versatile disc, video tape, gaming cartridge, memory stick, magnetic storage medium, optical storage medium, Flash memory, random access memory, and read only memory (see figure 8).

Art Unit: 3622

As per claims 10 and 68, Picco teaches:

The system of claim 1, wherein the transmitting system transmits the programming signal to the user via at least one network selected from the group consisting of: the Internet, intranet, private network, wired network, ATM network, wireless network, wide area network, local area network, and a public network (see column 14, lines 58-67).

As per claim 11, Picco teaches:

The system of claim 10, wherein the programming signal is streamed to the user over the network (see column 14, lines 1-17).

As per claims 12, 23, 27, 54, 72, 74 and 78, Picco teaches:

The system of claim 1, wherein the media object is transmitted in a format selected from the group consisting of: MPEG-1, MPEG-2, MPEG-4, MPEG-7, JPEG, motion JPEG, GIFs, Quicktime, ActiveMovie, DVI, and Indeo (see column 2, lines 1-27; column 11, lines 49-67).

As per claim 13, Picco teaches:

The system of claim 1, wherein the transmitting system utilizes a transmission protocol selected from the group consisting of: RTP, UDP, TCP/IP, and ATM to transmit the programming signal (see column 14, lines 58-67).

As per claims 14, 24, 33, 56 and 76, Picco teaches:

The system of claim 1, wherein the programming signal includes at least one media object containing content related to at least one program type selected from the group consisting of: news program, sports program, virtual reality program,

Art Unit: 3622

entertainment program, music video, game show program, motion picture program, video program, live program, audio program, polling question, educational program, non-commercial program, and a pre-recorded program (see column 6, lines 1-9).

As per claims 15, 25, 34, 57 and 77, Picco teaches:

The system of claim 1, wherein the programming signal includes at least one media object containing advertising related content (see column 6, lines 16-41).

As per claim 16, Picco teaches:

The system of claim 1, wherein the transmitting system receives a first media object and second media object from the input port, combines the first media object and the second media object into a composite programming signal and transmits the composite programming signal, whereupon receiving the composite programming signal a receiving system selects one of the first media object and the second media object based upon the user profile (see column 13, lines 1-55).

As per claim 28, Picco teaches:

The system of claim 26, wherein a first media object and a second media object both contain content targeted to a first user profile (see column 13, lines 1-55).

As per claim 61, Picco teaches:

The method of claim 52, wherein the step of identifying a user profile targeted by the media object further comprises:

obtaining user information; and compiling the user information into the user profile (see column 13, lines 40-55; figure 4, item 152).

As per claim 63, Picco teaches:

Art Unit: 3622

The method of claim 52, wherein the step of identifying at least one user associated with the user profile is accomplished by a receiving system (see column 13, lines 35-60).

As per claim 64, Picco teaches:

The method of claim 52, wherein the method further comprises storing the media object in a data storage device and retrieving the media object from the data storage device at a designated time for transmitting the media object in the programming signal to the user (see column 6, lines 57-67)

As per claim 69, Picco teaches:

The method of claim 66, wherein the method further comprises obtaining the user profile from a user profiling system in communication with a system selected from the group consisting of: the transmitting system, and a system for receiving the programming signal transmitted by the transmitting system (see figure 4).

As per claims 195-200, Picco teaches:

The method of claim 1, wherein the media object is transmitted in MPEG-4 format (see column 11, line 49 – column 12, line 6).

4. Claims 58-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Picco et al (U.S. 6,029,045) in view of Flickering (US 2005/0210502) and further in view of Olivier (U.S. 6,480,885).

As per claims 58-60, Picco fails to teach:

The method of claim 52, wherein the method further comprises:

Art Unit: 3622

establishing a chat interface between a user and a system transmitting the media object, wherein the chat interface utilizes at least one media object to facilitate communications. However, Olivier teaches a system that allows users to be targeted with customized messages via e-mail, chat or instant messaging based upon the users' profiles (see column 3, lines 5-32). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the application was made, to know that Picco would use the Olivieri system to target messages to users based upon the users' profiles. This feature would allow users of the Picco system to select the messages that the users would like to receive.

#### **Response to Arguments**

5. Applicant's arguments with respect to claims 1-34, 52-78 and 195-200 have been considered but are moot in view of the new ground(s) of rejection.

#### **Conclusion**

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL LASTRA whose telephone number is 571-272-6720 and fax 571-273-6720. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ERIC W. STAMBER can be reached on 571-272-6724. The official Fax number is 571-273-8300.
